

# Rules of subject Integrated Laboratory 2 (aerodynamics)

Author: Konrad Gumowski,

Valid in room number (lab.): 101 (ITLiMS, PW) in the academic year 2022/2023.

## 1 Contents - short:

Familiarizing students with basic knowledge of the physics of fluids and basic measurement techniques.

## 2 Course results:

After completing this course, the students will be able to measure and specify flow conditions, pressure gradients and aerodynamic forces.

## 3 Grading criteria:

The presence is strictly obligatory. Any absence needs to be justified as soon as possible, and exercise realised with another group.

Evaluation method: 40% continuous assessment based on laboratory work, 60% short tests at each meeting.
