

4x HEB320x6940 1019
1:10 S235JR

Technical drawing of a cross-section of a reinforced concrete column. The drawing shows the reinforcement layout, including longitudinal bars (118 mm diameter) and transverse bars (2x 113 mm diameter). The reinforcement is arranged in a grid pattern. The drawing includes dimensions for the column size, reinforcement spacing, and bar diameters. A table in the top right corner provides additional information: 'BI 12' and '95'.
