

QUADRIC SURFACES

PROBLEMS				
44	45	46	47	48

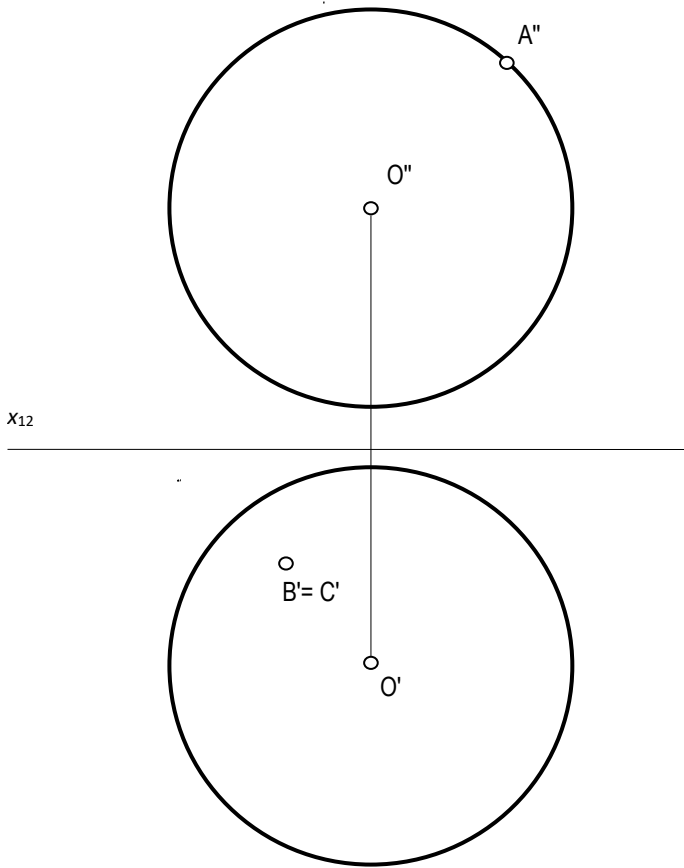

Projection of a quadric surface is limited by the contour which is a flat geometric figure.

View of a point belonging to the contour is a view of one point belonging to the surface.

View of a point inside the contour is a view of two points belonging to the surface.

44. Determine missing views of point **A**, **B**, **C** belonging to the surface of the sphere

45. The center of the sphere belongs to the line **n**. Point **L** and circle **m** belong to the sphere's surface. Determine both views (outline) of the sphere.

47. Find missing views of points **C** and **D** belonging to the cone's surface

46. Find missing views of contour generatrices **t₁**, **t₂**, **t₃**, **t₄** of the cone's surface

48. Determine contour generatrices of the surface of a horizontal cylinder which includes three given generatrices t_1 , t_2 and t_3 , where $t_1 \parallel t_2 \parallel t_3 \parallel \pi_1$, Determine also the missing view of point A belonging to the surface.
